

PEES Power Systems

Myanmar Civilian Solar Power Station

Overview

The Shwe Myoh Solar Power Project is expected to generate nearly 200 megawatts of electricity daily starting in June. The electricity will be directly connected to the national grid and transmitted to the Shwe Myoh Substation, which is owned by the Ministry of Electric Power. 8 TWh/year, with an average of over 5 sun hours per day. Even though hydropower is responsible for most electricity production in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong. YANGON (Xinhua): A total of 11 solar power plant projects are currently under construction and development in Myanmar, with a total capacity of 1,026 megawatts, state-run daily The Global New Light of Myanmar reported on Sunday. Among these, four projects are being built in the Union Territory of Nay Pyi Taw. The military-led government in Myanmar has launched a solar power initiative to tackle the country's severe energy crisis. This effort comes amid persistent power shortages and rolling blackouts that have plagued the nation since the military coup in February 2021. Currently, work on the solar tracker systems, including the base and tracker poles, has been completed. He also serves as a member of the State Administration Council, Deputy Prime Minister, and Union Minister at the Prime.
