

PEES Power Systems

Netherlands electricity market

Overview

The energy market is liberalised, and renewable subsidies are provided through schemes like SDE++.

- Netherlands's Energy Companies: Top Dutch energy firms RWE, Eneco, and Vattenfall generate about 25% of the country's electricity, with autoproducers accounting for a third. Key policies include phasing out coal by 2030, promoting green hydrogen, and expanding nuclear energy. The government oversees energy and climate. In 2024–2025 roughly half of the Netherlands' power generation came from renewables. According to national statistics, renewables (wind, solar, biomass) produced about 50–53% of electricity in 2024, led by wind power ($\approx 27\%$ of total generation, thanks to new offshore farms) and solar PV ($\approx 18\%$), with. The energy market is constantly changing and becoming increasingly complex. Nevertheless, we always want a realistic picture of the market. Supply and demand determine prices, production and distribution. This reliance is due to the extensive natural gas reserves found in the country.
