Netherlands lithium iron phosphate battery pack

Overview

Lithium Ferrous Phosphate custom battery packs provide some of the safest Li-Ion battery technology in the world. LiFePO₄ cells are significantly safer than LiCoO₂ cells and compared to lead batteries we see that with a LiFePO₄ battery, up to 100% of the nominal capacity can be used. Although the energy density is lower than other lithium-ion chemistries, lithium iron phosphate batteries provide higher power density and longer life cycles than other lithium.
