Obama s solar power generation principle

Overview

Private and Public Sector Commitments and Executive Actions Will Create Jobs and Cut Carbon Pollution Today, President Obama announced more than 300 private and public sector commitments to create jobs and cut carbon pollution by advancing solar deployment and energy efficiency. Recovery Act investments are helping the U. re-establish leadership in innovation, manufacturing, and deployment in these fast-growing industries, which will create new jobs, increase access to clean energy, and reduce greenhouse gas emissions. In the beginning of his Administration, President. The energy policy of the Obama administration was defined by an "all-of-the-above" approach which offered federal support for renewable energy deployment, increased domestic oil and gas extraction, and export of crude oil and natural gas. Americans have demonstrated their dedication to climate action through a wide variety of commitments. Learn more about these efforts. The commitments represent more than 850 megawatts of solar deployed - enough to power nearly 130,000 homes - as well as. Thanks to his commitment to tackling global warming and his leadership, the United States and the world are finally on a path to a future powered entirely by clean, renewable energy. Tonight, President Obama will deliver a farewell address in his hometown of Chicago.
