Onsite Energy Solar Panels Sold Separately

Overview

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system. This is the most common form of solar energy generation for residential homes and commercial buildings. The solar panels are typically installed on rooftops, carports, or. By Kristen Pollock, Sr. There are a couple ways to go about installing solar energy on site: one is financing the installation yourself and another is. Reduce utility costs, achieve energy independence and meet your sustainability goals by generating your own on-site power-and even selling surplus energy back to the grid. In turn, you can manage costs, generate.
