

PEES Power Systems

Outdoor telecom enclosures used in railway stations

Solar

Overview

Outdoor cabinets can be used in a variety of settings such as CCTV monitoring of the train, track and platform; or to house trackside functional electronics such as communications between the track and the train, or the signal box and the train. For our rail customers, our portfolio includes enclosures designed to Network Rail PA05 specification, SISS / CIS cabinets and LOCs to house telecom, signalling and switchgear equipment. Our engineering team has extensive experience working with rail projects throughout the UK. With its enclosures, climate control and power distribution product range, Rittal is the ideal partner for. For trackside signaling and rail stations, nVent SCHROFF offers a wide range of outdoor enclosures and cooling systems for applications, as well as indoor solutions for electronics contained in trackside buildings. Electronic enclosures for railway applications require robust mechanical. Westell is a collaborative partner in OSP deployment optimization providing customized, fully integrated, vendor neutral outdoor network equipment enclosures. Designed to house a variety of communications equipment, CUBE customers take advantage of our engineering and factory integration for.
