Overview

Solar panel mounting systems are now available for all kinds of roofs, from asphalt shingles to clay tiles, to standing seam metal, and everything in between. These may be large PV panels that are assembled into an array or PV shingles that are used in place of standard. S-5! offers a variety of engineered solutions for mounting solar PV and balance of system components on both standing seam and exposed-fastened metal roofing. Each assembly includes a leveling washer and membrane separator.
