Photovoltaic bracket waterproof pressure plate installation

Overview

As the world's leading manufacturer of solar mounting system, CHIKO Solar explained how to deal with the waterproof problem when the solar mounting bracket is installed on the roof!. As the world's leading manufacturer of solar mounting system, CHIKO Solar explained how to deal with the waterproof problem when the solar mounting bracket is installed on the roof!.

Photovoltaic bracket waterproof pre I a mounting system for solar thermal or solar photovoltaic panels. Consider the roof type (material and slope), we therproofing, installation convenience, and wind and snow loadings. The materials used to manufacture and install photovoltaic arrays must be able to withstand various harsh environments at the project site to ensure 25 years of weather resistance and corrosion. At Roof Tech, we've been redefining solar mounting solutions since 1994. Built on decades of Japanese innovation, every product we design is engineered to stand up to the harshest conditions - from heavy snow loads to torrential rains, hurricanes and even typhoons. Common materials include aluminum alloy, carbon steel and stainless steel.
