

PEES Power Systems

Photovoltaic inverter tax rebate rate

Overview

In 2025, homeowners who install their solar systems before the end of the year can still claim 30% of the total cost of the system as a tax credit. This includes solar panels, inverters, mounting equipment, wiring, labor, and even battery storage if installed with the system. The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your. Beyond the federal 30% tax credit, state and local incentives can reduce your total solar costs by an additional 15-40%. Some states offer such generous programs that your net solar cost drops below \$10,000 for a typical home system. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs. Adders (and additional requirements) may increase the percentage to monetize the credit through the Elective Pay mechanism. Manage the flow of electricity from a solar project to the grid.
