Photovoltaic panel angle iron

Overview

Aluminum angle is easy to work with, you can drill holes into it with commonly available tools, and the material is compatible with most solar panel frames. IronRidge® Tilt Mount supports a wide range of solar panel tilting angles, while also resisting the extreme wind and snow forces experienced over a building's lifetime. Our 10 -15 deg, 15 - 30 deg and 30 60 deg are mainly controlled by back leg's height, in this way installers can eliminate welding and cutting on site. PE Certified - Pre-stamped engineering letters available in most states. Exclusive Discount Code for ** 30% OFF ** Enter "Mountain" at checkout.
