

## PEES Power Systems

# Photovoltaic panel cleaning components

## Overview

---

The materials used for cleaning must be non-abrasive to protect the delicate anti-reflective coating on the panel glass. You will need a soft-bristle brush, a non-abrasive sponge, or a specialized solar panel cleaning tool with a soft, microfiber head. These inspections involve checking the solar panels, inverters, mounting materials, and other components for signs of wear, cracks, or corrosion. Solar panel maintenance: this refers to technical maintenance carried out by a professional and should ideally take place once a year. However, during everyday operation, contaminants such as dust, bird droppings, and leaves accumulate on the panel surface, reducing light absorption and consequently. Discover 10 effective solar panel cleaning methods to boost energy production by up to 25%.
