

## PEES Power Systems

**Photovoltaic panel dealers are  
not registered**

## Overview

---

In some states, a dealer may be fined or sued if they are not licensed, so the best thing is to check these regulations with the local department of commerce or state energy commissions. With the tremendous growth of solar installations and the continuing evolution of licensing requirements for photovoltaic and solar installers, IREC's National Solar Licensing Database provides information and references to the licensing, certification, and other requirements impacting the solar. While both licensing and certification have drawbacks, requiring solar contractors to be licensed or certified is preferable to no quality control of system installation and will result in baseline standards being met, which will in turn lead to higher consumer satisfaction. The North American. In most states and cities, obtaining a license to install solar panels is required. The specifics vary depending on location, but professionals in the field are expected to hold appropriate certifications and licenses. Explore the regulatory landscape that governs solar transactions. So, clarify this matter before you take any other steps.

## Photovoltaic panel dealers are not registered

---

### State Licensing Requirements

Most states require a licensed electrical or plumbing contractor for PV and solar-thermal systems, respectively. Some states require solar installers to obtain a separate, specialized solar contractor's license.

### Does Your Team Have the Right Solar PV Licenses? Find Out Now!

When used for solar panel installation/electrical work, this license will need to be renewed every three years. You'll also need to be registered as a business with the state.

### APPROVED LIST OF MODELS AND MANUFACTURERS (ALMM)

Accordingly, the Ministry of New and Renewable Energy (MNRE) issued "Approved Models and Manufacturers of Solar Photovoltaic Modules (Requirement for Compulsory Registration) Order, 2019" on 02.01.2019.

## Solar Panel company still haven't registered panels 6 months after

We had solar panels installed at the end of October last year. The solar panels and battery system all work great, but in order to export back to the grid and earn a little bit of money back you have to have ...
