Photovoltaic panel dismantling manufacturer

Overview

Our team of experts offers a safe and efficient solar panel dismantling service for both rooftop and ground-mounted installations. Solar panel deframing machine is responsible for removing the aluminum frames from scrap solar panels. It uses mechanical tools such as precision screwdrivers or cutting blades. The screwdrivers are programmed to precisely unscrew the screws fastening the frames, while the cutting blades can handle. Through advanced recycling technology, key materials such as silicon, silver, and copper can be effectively extracted from waste photovoltaic panels, achieving maximum resource utilization and avoiding excessive exploitation and waste of new resources. Meanwhile, if waste photovoltaic panels are. Make solar panel recycling more efficient and high-quality. Separates glass and cell/EVA sheet without breaking glass using our original technology, Hot Knife Separation Method.
