# Photovoltaic panel roof warehouse yard

## Overview

---

Rooftop solar systems are ideal for warehouses with large, flat roofs and can be installed without major structural changes. Yet, the amount of solar on these buildings remains surprisingly low. Why do so many warehouse owners hesitate to go solar, and what changes could unlock this untapped source of clean energy?

In percentage. Factories, logistics hubs, warehouses and industrial buildings often have significant roof space, and high energy usage, making them ideal locations for solar panels. Over the past few years, more and more businesses have realised the potential to harness free renewable energy simply by adding. So, the big question is — can you install solar panels on a warehouse roof?

The answer is a resounding yes! Let's explore how this works, what you'll need, and why it's a smart move for your business. But, can you power a factory with solar alone, and how much does it cost?

Large commercial facilities can't ignore fossil fuels' contribution to climate.
