Policy documents on microgrids

Overview

ing programs, policies, rules, and regulations for microgrids. As a result, the National Association of State Energy Officials (NASEO) and the National Association of Regulatory Utility Commissioners (NARUC) created this framework to serve as a resource and guidance f. ability to island and maintain critical loads during outages. As a. However, microgrids are highly specialized and complex, and lead to questions around ownership and operation, cost allocation, distribution of benefits, siting and configuration, and more. Department of Energy, and the National Association of State Energy Officials (NASEO). Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. There has been a substantial evolution in American microgrid development in the early. The MSWG aimed to bring together NARUC and NASEO members to explore the capabilities, costs, and benefits of microgrids; discuss barriers to microgrid development; and develop strategies to plan, finance, and deploy microgrids to improve resilience. Based on member input, the MSWG developed two.
