# Price of antioxidant energy storage tank in Mexico

## Overview

---

In this regard, experts estimate that the technology already exists in Mexico to store up to 1.5 megawatts of energy, which allows users of all sizes and in all types of interconnections, including the wholesale electricity market and large industry, to access photovoltaic generation. Mexico's ambitious clean energy goals and rapidly expanding renewable energy capacity (primarily solar and wind) necessitate energy storage to address intermittency and grid stability challenges. Advancements in battery technology, particularly lithium-ion batteries, are leading to significant cost. The Mexican thermal storage tank market represents a critical component of the nation's industrial and energy infrastructure, poised for a period of significant evolution through the forecast horizon to 2035. The market is projected to reach USD 3,536.88 Million by 2034, exhibiting a growth rate (CAGR) of 11.
