

PEES Power Systems

Principle of homemade solar generator

Overview

To build a solar generator, you'll need a solar panel, a charge controller, a deep-cycle battery, and an inverter. The panel collects sunlight, the charge controller manages the flow of power to the battery, and the inverter turns that stored power into electricity you can. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. You don't need to be an expert to build one. With a few tools and some basic knowledge, you can create a reliable source of energy. Then all the relevant input and output sockets are wired and mounted on the outside of the case where they are easily accessible. It provides a portable power source ideal for emergencies, camping, or reducing reliance on traditional electricity.
