## Overview

---

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis. Weekly spot price report for 182mm modules will be based on the 182\*182-210mm format from June 2024 onwards due to the slim price gap among varying formats. BC module prices in China will be added. Price Stabilization After Volatility: Solar module prices have stabilized in 2025 with global wholesale prices ranging from \$0.28/W, ending years of dramatic fluctuations as supply-demand dynamics rebalance and weak suppliers exit the market. These manufacturing cost analyses focus on specific PV and energy storage technologies—including crystalline silicon, cadmium telluride, copper indium. Solar manufacturers are facing rising cost pressure as silver paste now accounts for up to 30% of total cell production costs. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Market analysts routinely monitor and report.
