

PEES Power Systems

Quotation for a 15MWh Outdoor Storage Unit for a Wastewater Treatment Plant

Overview

While every plant is unique, we've analyzed actual costs vs gallons per day (GPD) flow rates of all our package wastewater treatment plants and developed an equipment cost calculator to provide approximate budget pricing. 20/kWh across the United States. Time-of-use rates, demand charges, and power factor penalties can double effective energy costs. Facilities with access to industrial rate structures or municipal utilities enjoy substantial operational advantages. The baseline WSI Package Plant includes our Bio-Chip Reactor (BCR) MBBR system with an integrated Dissolved Air Flotation (DAF) clarifier for BOD and TSS reduction only. Supporting aeration blowers, Bio-Chip MBBR media, and DAF mechanicals are also included. These sewage treatment solutions are suitable for permanent or temporary use in areas outside municipal wastewater systems.
