

## PEES Power Systems

# Ranking of my country s solar power generation

## Overview

---

This graphic visualizes the top 15 countries by cumulative megawatts of installed photovoltaic (PV) and concentrated solar power (CSP) as of 2023. Solar power is clean, green, inexpensive, and renewable energy that is produced when sunlight strikes human-made solar cells and is subsequently converted into electricity. Concentrated solar power (CSP, also known as "concentrated solar thermal") plants use solar thermal. This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest. In 2025, solar power is the cornerstone.

## Ranking of my country s solar power generation

---

### Solar Power by Country 2026

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

### Top 5 Countries Leading in Solar Power Adoption

Discover the top 5 countries leading in solar power adoption in 2025, ranked by capacity, growth, and innovation. See who's powering a clean energy future!

- LIQUID/AIR COOLING
- ON GRID/HYBRID
- PROTECTION IP54/IP55
- BATTERY /6000 CYCLES

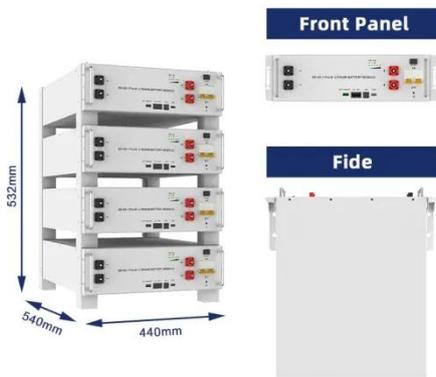

### Which countries use the most solar energy? [Top 13, ...

Our rundown of the countries around the world using the most solar energy, from Mexico to China

### Solar power by country

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

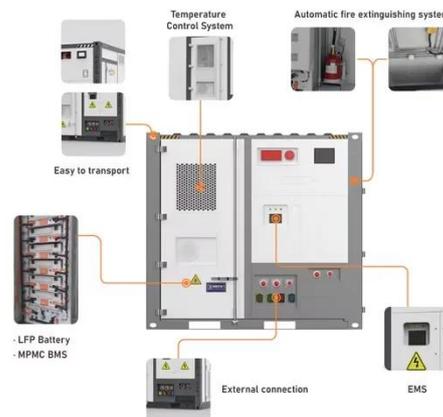

## Country Rankings

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

## Solar power by country

Overview  
 Asia  
 Global use  
 figures  
 Africa  
 Europe  
 North  
 America  
 Oceania  
 South America

Armenia due its geographical and climate properties is well-suited for the solar energy utilization. According to the Ministry of Energy Infrastructure and Natural Resources of Armenia the country is capable of producing 1850 kWh/m per year. For comparison European countries are capable of around 1000 kWh/m per year on average. Two main panel types utilized in Armenia are the photovoltaic and thermal solar panels. The ...

## Solar electricity generation, percent

The average for 2023 based on 185 countries was 4.92 percent. The highest value was in Luxembourg: 32.39 percent and the lowest value was in Bermuda: 0 percent. The indicator is available from 1980 ...

## Ranked: The 15 Countries With the Most Solar Power ...

See which countries have installed the most solar power, and which ones have the fastest annual growth rates over the last decade.

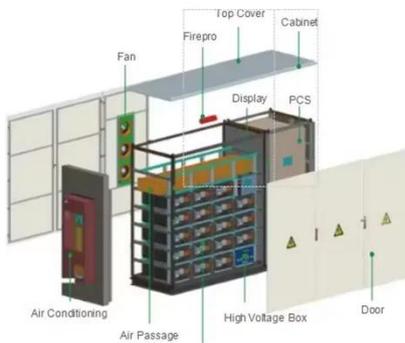

## Chart: Which countries get the most power from solar and wind?

Wind and solar are on the rise worldwide -- here are the 10 countries that rely on the clean-energy sources most for their electricity. All of these countries used wind and solar to produce ...

## Top 100 Countries by Share of Renewable Energy in Power ...

This ranking tracks the share of electricity generated from renewable sources (hydro, wind, solar, bioenergy and other renewables) as a percentage of a country's total electricity generation.

## Top Solar Power Countries in 2025: Leading the Global Renewable

Explore the top solar power countries in 2025, including China, the U.S., India, Japan, and Germany, plus emerging leaders like Brazil and Australia, driving the global shift to sustainable ...
