Resort uses off-grid solar-powered container 120 feet

Overview

Chena used 40-foot-long shipping containers stacked two high and three long on each side to create the outer walls of the 120-foot-long by 60-foot-wide garage that the resort also intends to fill with heavy equipment and utilize for other to-be-determined uses in the future. Thirty miles off the Pacific Coast of Panama is an Eco Island Adventure Resort fully supported by solar, battery, and generators with no utility connection. The power system supports dozens of guests and a staff of 150. NewGrid oversaw the implementation of approximately 2 megawatt hours of lithium. Whether you are running a luxury bungalow, a backpacker lodge, or an entire resort village, a mobile solar container gives clean, silent, and remarkably low-maintenance power—minus the logistical inconvenience of fuel shipments. Our fully off-grid, clean-energy platforms power everything from guest lockers and restrooms to food & beverage modules and digital service hubs—bringing. Our off-grid shipping container homes offer a unique opportunity to create a self-sufficient, personalized haven designed to fit your needs. From innovative floor plans to green features, discover how you can easily achieve energy independence. These prefab solutions make unplugged living. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. nts. Solar panels lay flat on the ground.
