

PEES Power Systems

Roof corrugated board photovoltaic bracket manufacturer

Overview

CorruBracket 100T is a high-performance mounting solution engineered for North American corrugated metal roofing profiles. Featuring a factory-applied EPDM gasket and structural aluminum design, it provides a leak-free attachment for solar PV, walkways, and other rooftop utilities. The 500T is specifically designed to securely and safely attach walkways and other utilities, along with rail-based PV systems or low-profile. When mounting on corrugated and sandwich roofs, you fix the photovoltaic installation directly to the purlins of the roof construction. For wooden purlins, you need the stock screw set for wood and for steel purlins the stock screw set for steel. For you, this means working more efficiently, with less fuss. Jucai Huixn can provide OEM and ODM services for you.

Roof corrugated board photovoltaic bracket manufacturer

ClickFit EVO Corrugated roof

Installing solar panels - we make it smarter, faster and simpler. How? With the ClickFit® EVO Corrugated Roof, a mounting system specially developed for corrugated roofs, such as those often ...
