Serbia's Renewable Energy Soars: Highlights from RES Serbia 2025

With new wind and solar power plants, successful RES auctions, and groundbreaking projects in green hydrogen and energy storage, the country is positioning itself as a leader in the ...

Serbia to start developing 1 GW solar project with BESS in 2026

Serbia plans to start the construction of 1 GW of photovoltaic power plants with battery storage systems this year, state-owned energy producer Elektroprivreda Srbije (EPS) quoted energy ...

Serbia's 1-GW solar-plus-storage project to start construction in 2026

Serbia's project to build 1 GW of new solar capacity, coupled with storage, is expected to enter the construction phase in 2026, the country's minister of mining and energy said today, noting ...

Serbia installs 134.3 MW of solar in 2025

Solar energy in Serbia is experiencing rapid growth and an increasingly important role in the country's energy transition. After years of gradual development, 2025 marked a historic record in the ...

Serbia Installs 134.3 MW of Solar in 2025

Serbia added 134.3 MW of solar last year, according to data shared by the Association Renewable Energy Sources of Serbia (RES Serbia). The figure is a record for a calendar year in Serbia, building ...

Serbia Added 138 MW of Solar and Wind in 2025: A Turning

Serbia's renewable energy sector has just completed one of its most dynamic years to date. With 138 MW of new solar and wind capacity added in 2025, the country is accelerating its shift

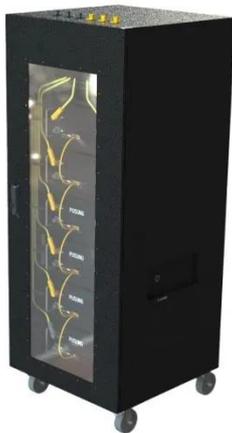

Serbia installs 134.3 MW of solar in 2025

Serbia had a record year for solar additions in 2025, led by deployment of large-scale plants. The country has a gigawatt-size project pipeline, although most remain in the earlier stages of

Serbia to host largest solar power plant in

A major renewable energy project is set to transform the Tresibaba area in eastern Serbia, with construction soon to begin on the largest solar power plant ever built in the country. The facility ...

Serbia to add 138 MW in solar, wind in 2025

The solar and wind fleet in Serbia is expected to expand by 138 MW in 2025, with 76 MW in wind farms and 62 MW in solar power plants, according to the country's energy balance for 2025.

Serbia's renewable energy corridor - wind, solar, hydro and the grid of

This article maps the emerging "Serbian

Renewable Energy Corridor," examining each region, technology, infrastructure challenge and the long-term competitiveness vision.
