Solar panel 200 watts of power generation

Overview

Real-world performance varies significantly by location: A 200W solar panel produces 600-1,200 Wh daily depending on climate, with Southwest US locations generating twice the energy of Pacific Northwest installations. Plan your system capacity based on winter performance in your specific region. In the next sections, you'll get: Real-world output (not STC fantasy) so you know your daily energy budget. 200-watt solar panels are on the lower end of the wattage spectrum of solar panels available today, and depending on the type of solar project you have, may or may not be the best.
