

PEES Power Systems

Solar panels connected to power storage container box

Overview

A mobile solar container is a factory-built, transportable unit that integrates solar panels, battery storage, and power controls—providing plug-and-play, rapid-deploy clean electricity for remote sites, events, and emergency response. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power. For instance, specialized units like the LZY-MSC1 Sliding Mobile Solar Container pack fold-out solar panels, inverters and batteries into a 20-foot steel box. Deployed in under an hour, these can deliver anywhere from 20–200 kW of PV and include 100–500 kWh of battery storage. In short, you can. A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. These turnkey solutions integrate solar panels, inverters, batteries, charge controllers, and monitoring systems into a single transportable unit that. The LunaVault paves the way for a sustainable and independent energy future, demonstrating the limitless potential of renewable power systems. How many containers do you need?
