

PEES Power Systems

Solar power generation user group

Overview

is organized to provide an open forum through conferences and technological aids to the Owners/Operators of Power Generation Equipment and systems for effective communication, discussion, and information dissemination regarding the operation, maintenance. Power Users Group, Inc. They encompass topics ranging from the needs of current power systems to enabling future power systems with a much larger share of annual energy coming from wind and solar energy. What your colleagues were telling CCJ subscribers five, 10, 15, and 20 years ago Five years ago The 7F Users Group and CCJ collaborated on the first virtual user-group meeting conducted as a result of the global pandemic. This is a large and active user group that meets for several days each spring and fall. This is. All new applications should be submitted at the following link: In case you have any questions or issues, please feel free to contact Tim Null and/or myself at Timothy Null <tnull@eastman.com>, Gregory Carvalho <Questions2007A7@users-groups.

Solar power generation user group

Operations and Maintenance (O& M) Users Group

The O& M Users Group represents a large and vibrant community of owners and operators of wind and solar power plants and is the only truly independent forum for the sharing of operational and maintenance issues.

main@ESIGOM.groups.io , Subgroups

This group is the main forum for the ESIG O& M Users Group. It covers general topics related to operations and maintenance of wind and solar generation, as well as activities and news on the Users Group.
