

## PEES Power Systems

# Solar water pump battery life

## Overview

---

Q: How long do batteries last?

A: 5-7 years with proper maintenance Q: Can it work in cloudy weather?

A: Yes, through battery reserves "Solar pumps aren't just eco-friendly – they're economically smarter long-term. " – International Renewable Energy Agency Report. Say your pump uses 1 kW and runs 5 hours a day. That's 5 kWh energy needed daily. LiFePO4 batteries let you safely discharge 80-90%, while lead-acid only 50%. Plus, you need buffer capacity for cloudy days and temperature variations. Solar pumps are brilliant for patios and ponds because they're cord-free, safe around kids and pets, and cost nothing to run. But sunlight isn't a switch—it changes minute to minute. A well-matched solar pump battery backup keeps water moving when the sky goes gray. Each picks up where grid power leaves. A: A.
