## Overview

---

Depending on an operator's technology, even a site hosting just a single mobile operator may house multiple base stations, each to serve a different air interface technology (CDMA2000 or GSM, for example). 1 Billion Dollars from Somaliland internal mobile market. "Ministry": means the Ministry of Information and Communication Technology established under the Act. "Interconnection": means reciprocal services offered by two or more operators providing a public. Telecommunications in Somaliland constitutes a competitive, entirely private-sector-led industry that delivers mobile voice, internet, and financial services across a largely underserved region, achieving approximately 95% telephone coverage through entrepreneurial networks rather than state. Somtel introduced 5G in Somaliland's capital, Hargeisa, in partnership with eDahab, the leading mobile payments provider in January 2024. The company claims to be the first operator in the region to launch a 5G network. Other African nations that have rolled out 5G include South Africa, Uganda. Telecommunications in Somaliland, an internationally unrecognised republic claimed by Somalia, are mainly concentrated in the private sector.
