# South America Energy Storage Frequency Regulation Project

## Overview

---

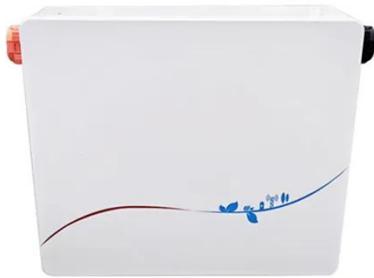

This report provides a comprehensive analysis of the frequency regulation energy storage market, segmented by application (Grid Side, Others), type (Primary FM Energy Storage, Secondary FM Energy Storage), and key geographic regions. South America is the continent most dependent on renewable energy, but it is a market that has been difficult for the energy storage industry to penetrate - most South American countries have no storage regulations and offer few incentives, but Chile is leading the way. Given that South America is, Atlas Renewable Energy recently inaugurated the 200 MW/800 MWh 'BESS Del Desierto' project in Chile's Antofagasta region days after closing \$510 million to build the 215 MW solar plus 418 MW/1,672 MWh BESS Estepa site. pv magazine spoke with Alfredo Solar, Atlas' regional manager for Chile, about. While the U. was expected to have nearly 60 GWh of installed battery capacity by the end of 2023, AMI estimates that Latin America had less than 1 GWh of operational BESS projects—a 60x difference. This large gap will be bridged at different speeds based on each country's specific regulations. To. What is the book "When Does Automation in Government Thrive or Flounder?"

" about?

Graham, N., & Yépez-García, A. State of Charge: Energy Storage in Latin America and the Caribbean. 18235/0003246 Graham, Nate, Edwin Malagón, Lisa Viscidi, and Ariel. Revenue Models: Independent BESS now allowed in frequency regulation and price arbitrage markets, boosting shared storage by 400% in H1 2024. □ Argentina: Distributed Demand: New policy raises self-consumption cap to 12MW, triggering a surge in residential and industrial PV+storage. Effective integration and use of energy-storage technologies will be a key enabling factor for balancing increasing levels of variable renewable energy, providing.
