

PEES Power Systems

Southern District Solar Power Generation System

Overview

This document is an administrative and technical standard that specifies the requirements of the Southern Public Power District (SOUTHERN PPD) for the interconnection of Distributed Generation (DG) facilities to the SOUTHERN PPD system. We encourage potential DG operators to review the Distributed Generation Standard to identify the requirements for successful projects. The following steps are required for customer-owned distributed. Southern Power and its subsidiaries, some of which are owned in part with various partners, own or operate 55 facilities operating or under development in 15 states with more than 13,150 MW of generating capacity in Alabama, California, Delaware, Georgia, Kansas, Maine, Nevada, New Mexico, North. Georgia Power's Distributed Generation Programs allow customers and solar developers to enter into long-term contracts for projects ranging from 250kW to 6MW, in which Georgia Power purchases 100% of the renewable energy generated from the solar facility. Georgia Power provides resources to help. The Southern Alliance for Clean Energy is a nonprofit organization that promotes responsible and equitable energy choices to ensure clean, safe and healthy communities throughout the Southeast. The primary objective of this standard is to ensure a safe.

Southern District Solar Power Generation System

Self Generation Incentive Program (SGIP) , SCE

To receive an SGIP incentive, you must be an SCE customer. Customers applying for the Residential Solar and Storage Equity Budget (RSSE) must be a California residential customer, which include ...

Our Project Map

Southern Power, a subsidiary of Southern Company, is a leading U.S. wholesale energy provider meeting the electricity needs of municipalities, electric cooperatives, investor-owned utilities and ...

Solar in the Southeast

These resource plans, along with data that all utilities report annually to the U.S. Energy Information Administration (EIA), are used to produce forecasts for total installed capacity of solar power (in ...
