Surge-proof Maintenance Services for Australian Communication Cabinets

Overview

The TCS Group can provide and assist with the building of a complete new communications room or even if it is just adding new racks, cabinets, power filters, surge protection, climate control, etc, to your existing site. A planned maintenance strategy allows you to control operational costs, improve system reliability and reduce the impact of unexpected failures. No matter the stage of your project, proactive servicing supports smarter, more efficient ways of working. In challenging locations, safety and compliance. TCS is a communications provisioning company specialising in voice, data and electrical cabling, installations, audio visual and CCTV solutions, LAN and WAN solutions, training, sales support, maintenance, PABX and contact centre consulting and are also able to provide associated communication. We Build Next Generation Telecommunication Networks Across Australia. Our expertise covers the latest equipment used on Telstra, Optus EJV, Vodafone and NBN networks. Indoor works such as rack installations, rectifiers and multiplexers, and base stations for 5G LTE, 4G, and 3G technologies. We understand that today's companies house a large number of diverse bandwidth-intensive devices, including bladed servers. We provide preventative maintenance programs and 24/7 emergency response to ensure 100% uptime of your telecommunications infrastructure. Loss of Revenue: Interrupted voice, data, or internet services can lead to customer churn and lost revenue.
