Overview

The proposal would reduce the tax credit for solar panels for private individuals to 15% (from 20%) beginning July 2025 (but not change the current credit cap of a benefit of SEK 50,000 per person annually) and would also eliminate the credit for micro-production of renewable energy. The proposal would reduce the tax credit for solar panels for private individuals to 15% (from 20%) beginning July 2025 (but not change the current credit cap of a benefit of SEK 50,000 per person annually) and would also eliminate the credit for micro-production of renewable energy. The Ministry of Finance on Ma, published a proposal (Swedish) that would reduce tax subsidies for installing solar cells. Svensk Solenergi, Sweden's leading solar association, has criticized the proposals. From July 2025, the so-called green technology deduction will be reduced from 20% to 15% for private individuals installing solar panels. While this sounds like a big cut, it's important to. Sweden has surpassed its solar energy target of 2.6 GW in the revised NECP draft, though overall renewable energy contributions are pending as the Renewable Energy Directive revision process comes to an end. Want to know more about this policy ?

Learn more Budget 2025 - tax. In 2023, over 200 000 Swedish homeowners received a tax reduction for the installation of green technologies. They invested a total of SEK 22 billion, 80% more than in 2022 (SEK 12 billion). But in 2024, a decline is expected.
