

PEES Power Systems

Tax policy for solar rooftop power generation

Overview

This legislation brings significant changes to the federal tax credit for residential and commercial solar and battery systems. Under this new law, homeowners who purchase their systems with cash or a loan will no longer be eligible for the 30% federal tax credit after. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. Tax Credit includes installation costs. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. President Biden signed the Inflation Reduction Act into law on Tuesday, Aug.
