The school uses 10MW of Asia-Pacific off-grid solar containerized solar power

Overview

The National Electrification Administration (NEA) and the Department of Education (DepEd) formed on Wednesday a partnership to put up solar energy infrastructure in far-off schools that lack access to power supply. Off-grid schools are located in areas where extending the conventional electrical grid is impractical or too expensive. They often serve rural or remote communities lacking infrastructure for reliable grid access. Under the Memorandum of Agreement (MOA) signed between NEA Administrator Antonio. At Sunchees, we provide high-performance solar power systems designed for the unique needs of schools, universities, and community learning centers worldwide. The project aims to provide sustainable energy to schools in underserved regions.
