# The voice-controlled solar power lamp is broken

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

**ENERGY STORAGE SYSTEM**

## Overview

---

Most solar light failures are caused by dirty panels, dead batteries, or water damage. For persistent issues, reset sensors or check wiring connections. To change the voice control switch of a solar lamp, follow these steps: 1. Identify the lamp model and manufacturer, 2. The lifespan of solar lights' rechargeable batteries is typically 300-500 charges, and a decrease in light duration can indicate it's time to replace them. If it's too sensitive, your light might never turn on — or it could shut off too soon. If it's unresponsive even in total darkness, the sensor may have failed and will. The level of ambient light is detected by light sensors. test a led bulb with a multimeter?

Why Doesn't the Light Turn on?

How do I replace the battery?

Why are my flashlight bulbs dim?

Solar lamps are a type of lighting fixture used.
