Tokyo solar power

Overview

Nearly all houses in Tokyo will have to install solar panels after April 2025. The regulation - passed by the Japanese capital's local assembly on Thursday - requires 50 major construction firms to equip homes of up to 2,000 square metres with renewable energy power sources. For more information on the mandatory solar power generation installation measure, please view the Ordinance Revision to Halve Carbon Emissions (Carbon. To encourage the generation of renewable energy, the Tokyo Metropolitan Government introduced a regulation mandating the installation of solar panels on the roofs of new detached buildings starting in April 2025. Starting in April 2025, a new system mandating the installation of solar power will be implemented. This directive is a key part of the city's comprehensive strategy to achieve net-zero carbon emissions by 2050.
