Uninterruptible power supply for wireless communication base station bl13

Overview

The Power-Pac offers peace of mind for the system designer or base station operator. This unique power supply assures that a base station can remain up and running to power communications when it is often needed most - during a power outage. It allows mobile phones to work within a local area, as long as it is linked to a mobile or wireless service provider. It is a fixed point of communication. Instantaneous backup power for your emergency VoIP systems and router/modems. The APC Back-UPS Connect CP12142LI is an uninterruptible power supply (UPS) that is specially designed to power compatible router/modems and VoIP telephony systems in case of emergencies for prolonged periods of time. ESTEL battery backup systems excel in meeting these challenges, offering an uninterruptible power supply tailored to the needs of telecommunications equipment. 45V output meets RRU equipment.
