What are the photovoltaic panels that are purely leased

Overview

A solar lease is a type of solar panel financing where a third-party company installs solar panels on your home, and you pay a fixed monthly fee to use the energy. You don't own the system—they do. But you get the benefits of solar without the upfront costs or maintenance. “By leasing solar, Americans can avoid upfront costs and could start saving immediately,” says Wyatt Semanek, Public Relations Manager at Sunrun, a U. -based provider ranked on our best solar companies list that provides residential solar electricity and solar power services across 12 states. Starting in 2026, solar leasing remains one of the most popular ways to go solar—especially as the 30% tax credit for buying solar has expired and the tax credit for leasing is still available through the end of 2027.

What are the photovoltaic panels that are purely leased

Leasing Solar Panels: The Complete Guide

In a typical solar lease, a third-party company (often called the lessor) installs and owns the panels on your property. You, the lessee, agree to pay a predictable monthly payment for the power generated.
