What is a generator wind shield

Overview

Instead of a shed or other outdoor generator enclosure, a generator cover offers an affordable way to keep rain, snow, dust, and debris out of this useful piece of home technology, and it minimizes the effects of sun exposure on sensitive components. Protect your 4000-12,500 starting watt portable open frame generator with Champion's Storm Shield S Weather Cover by GenTent®. The natural airflow design allows safe operation and maintenance while the cover is on and withstands up to 70 mph winds, up to 12 inches of rain per hour and up to 18. Your portable generator is a reliable and easy-to-use power source with many applications, but severe weather significantly reduces its usability. We've got good news—you can cover your generator while it's running. We may earn revenue from the products available on this page and participate in affiliate programs.
