What is the export tariff for Chilean solar modules

Overview

For international businesses, the key principle is that foreign goods can be imported, stored, modified, assembled, and re-exported without incurring Chile's standard 6% ad valorem customs duty or its 19% Value Added Tax (VAT). This article explores how Chile's Free Trade Zones (Zonas Francas)—particularly the zone in Iquique (ZOFRI)—offer a powerful platform for solar component assembly and distribution. By using these zones, businesses can establish a cost-effective Chile manufacturing hub with preferential access to. The classification of photovoltaic modules is the basis for export declaration, primarily based on the International Harmonized System of Product Classification and Coding (HS Code). According to the latest information in 2025, photovoltaic products are mainly classified under Chapter 85, which is. "Photovoltaic modules and laminates consisting of crystalline silicon photovoltaic cells, including laminates shipped or packaged with other components of photovoltaic modules, and thin-film photovoltaic products produced from amorphous silicon (a-Si), cadmium telluride (CdTe), or copper indium. This article outlines the business case for a solar module factory in Chile, designed specifically for export to Mercosur and Andean Pact member nations. -Chile Free Trade Agreement (FTA) came into force on Janu, tariffs on 90 percent of U. exports to Chile were eliminated immediately. Under the FTA, all trade between the U., zero tariff), Despite the zero tariffs in place, certain products. The Free Trade Agreement between China and Chile provides for the full or partial elimination of import tariffs for most energy products and technologies, including: Rules of origin delineated in the Agreement include provisions preventing goods only undergoing minimal transformations in one of the.

Solar Manufacturing in Chile: Using Free Trade Zones for Growth

Discover how Chile's Free Trade Zones can lower tariffs and taxes for your solar business. Learn to set up a cost-effective Chile manufacturing hub for the Americas.

Exporting to Chile: Everything You Need to Know

For many goods, the general tariff rate is 6%, but depending on the product category and country of origin, this rate can be significantly reduced or even eliminated. It is crucial for exporters to verify ...

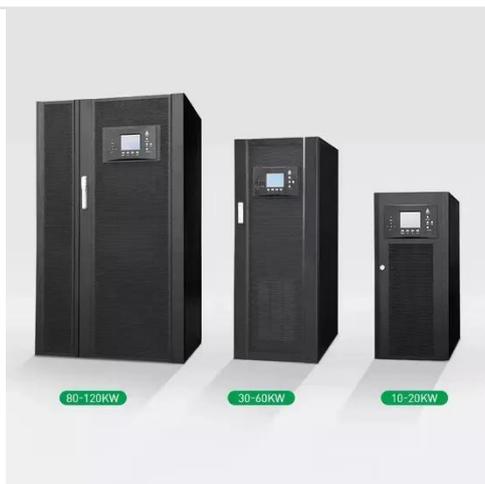

Tariffs Solar Products

Tariffs on Chinese solar cells increased from 25% to 50% in 2024 (The White House 2024). Tariffs protect domestic manufacturing jobs but reduce overall employment in the industry. Tariffs have had ...

Photovoltaic modules and laminates: Measures in force

For importations of subject goods for which the exporter has not been issued specific normal values, the rate of anti-dumping duty is equal to 154.4% of the export price.

Chile-China Free Trade Agreement - Policies

The Free Trade Agreement between China and Chile provides for the full or partial elimination of import tariffs for most energy products and technologies, including:

QB 23-507 Solar Cells and Modules 2023

Such duty shall be imposed on the declared value of such modules, including the cost or value of the non-cell portions thereof (such as aluminum frames), as Customs in its regulations or
