

## PEES Power Systems

# What is the solar energy storage subsidy

## Overview

---

All residential storage systems over 3 kilowatt-hours (kWh) in size are eligible for the 30% tax credit when purchased and installed by the end of this year. The most lucrative tax credit currently available is the federal solar tax credit, but it's set to expire. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. The credit for solar upgrades was extended through 2025, empowering more homeowners to switch to solar. Find out which incentives and rebates you qualify for. All across the United States, regulators and utility companies are beginning to recognize the value of energy storage.
