What is the vertex of the photovoltaic cylindrical bracket

Overview

It is a reinforced concrete independent foundation set under the front and rear columns of the photovoltaic bracket, consisting of a foundation bottom plate and a foundation short column above the bottom plate. Let's face it - photovoltaic brackets are like the unsung heroes of solar energy systems. While everyone oohs and ahhs over shiny solar panels, these structural workhorses literally carry the weight. The general materials include aluminum alloy, carbon steel, and stainless steel.
