What size solar panels are recommended

Overview

Which size of the solar panel is best, sixty or 72 inches?

There isn't much to choose between the two standard sizes of solar panels. The main thing that will affect your decision to go for 60-inch or 72-inch panels is how they fit into the roof space you have available for your. Online solar calculators can give a rough estimate of how much solar you need to power your home, but you may want to perform your own sizing calculations to fine-tune your choices. Here's a step-by-step overview of the process we follow when sizing solar systems for our customers.

What size solar panels are recommended
