Who will get the benefits of the community photovoltaic panels

Overview

For those who cannot install solar panels on their property or prefer a shared approach, community solar provides an accessible and environmentally friendly option. Community solar is one of the fastest growing segments of the U. Department of Energy defines community solar as any solar project or purchasing program, within a geographic area, in which the benefits flow to multiple customers such as individuals, businesses, nonprofits, and other groups. If your community is considering solar options but faces limitations for panel placement on homes, then community solar might be the perfect. Community solar is a renewable energy program when you join a local solar farm and get bill credits on your utility bill without installing panels on your property, with contracts typically lasting 5-25 years and 10-20% guaranteed savings. It's perfect for renters, homes with unsuitable roofs, and.
